HELLO GOOGLE & FRIENDS, I need your help as an Alibi and witness to enter/ explore and open source the collective conscious/ conscience (Super Ego). Recently, I have been subjected to: false narrative, disinformation, fraud, extortion, outright lies, denials and toxic make-believe. I was hoping you would view my work on YouTube, Facebook and Archive.org, and consider (politeness, with me for a "Real News" (voice, independent, non-profit) Reality TV Show, some live stream & some edited into brief episodes: Denialism of an inverted Truman Show, where one or multiple characters record & broadcast public matters in public spaces. The Plot will allegedly revolve around the investigation into the mysteries of the Soul/Conscience, etc. (seemingly back at times when revealing Collective Crimes against Humanity, while discovering the beautiful and often unlit street of real efforts many are making without the incentive of Power, Money or Speed. This would accomplish several things:
 1. an unprecedented historical, cultural record
 2. a positive, humane, heartfelt change to corrupt out threat Reality TV
 3. a real time, interactive, open-sourced Trust accounting design idea
 4. an example of Transparency for Global Leaders

Development of

Emergency Backup Systems

Why this petition matters

As a concerned citizen, I am deeply troubled by our reliance on the global supply chain for basic necessities. This dependence not only exposes us to potential contamination and disease (as witnessed during the COVID-19 outbreak) but also supports unethical labor practices in countries where modern slavery is prevalent. Our current system fails to protect us during emergencies such as disease outbreaks or blackouts, leaving many vulnerable and without access to essential resources like water, heating, food, clothing, and shelter.

To address this issue, we must require our city to research, develop and maintain self-sufficient backup systems (1,2) that can meet citizens' basic needs during major disasters without compromising our local environment or health. These systems should be designed with the capacity to function independently of external aid or resources.

According to the United Nations Office for Disaster Risk Reduction (UNDRR), cities that invest in disaster risk reduction measures can prevent significant losses both in terms of lives and infrastructure (UNDRR Report 2019). Moreover, a study published by the National Bureau of Economic Research indicates that increasing local self-sufficiency can reduce vulnerability to global supply chain disruptions (NBER Working Paper No. 27439).

By mandating these changes at a city level we are not only safeguarding our community against future crises but also taking an ethical stand against exploitative labor practices abroad.

Please sign this petition urging our city officials to prioritize local self-sufficiency through the development of emergency backup systems.

Thank you for your consideration.

(1) self-sufficient, adjective; needing no outside help in satisfying one's basic needs, especially with regard to the production of food

(2) backup systems include but are not limited to: clean water, food, shelters and essential tool production and delivery systems not reliant on electrical or petroleum powered mechanisms. Some possibilities include but are not limited to harvesting natural gasses from waste systems and incorporating gravity plumbing wherever possible.
